

The

Neuroscience

of

Sexuality

Can an MRI tell if you're in lust, in love, or attached?

What can our nearest cousins, the bonobos, teach us about relationships?

Are our brains wired for social or sexual monogamy?

Spirituality

Can an MRI tell if you're happy, compassionate, or enlightened?

What is the basis for emotions, empathy, intuition, and a sense of self?

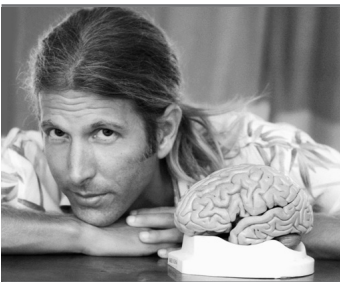

Are our brains wired to perceive the world as it is?

Sustainable Society

Can an MRI tell if you're conservative or liberal?

What cognitive blindspots prevent us from making effective social decisions?

Are our brains wired to get along with each other?

Dr. Mark Olson has an M.A. in Education and a Ph.D. in Neuroscience, specializing in Cognitive and Behavioral Neuropsychology and Neuroanatomy from the University of Illinois where he taught neuroanatomy for graduate and medical students and studied memory, attention, pheromones, and aesthetic preferences. He teaches anatomy for numerous massage and yoga programs throughout the Hawaiian islands, and has a variety of experience with sustainability, permaculture, NVC, and meditation.
